Введение

Что же тут есть?

Идея	сделать что-то полезное с нуля, вдохновение с YouTube (Flappy Bird)
Какие цели преследует	убийство скуки, позволяет отвлечься во время работы или учёбы
Дополнительные плюсы	маленькие отличия от оригинальной версии, которые я считаю мега хорошими плюсами
Повышенная вовлечённость	это связано с тем, что игровой процесс немного легче оригинального
Высокая частота кадров	честные 60 fps, дающие значительно большую плавность по сравнению с оригиналом

DO YOU NEED LONGER TEXT?

Mercury is the closest planet to the Sun and the smallest one in the entire Solar System. This planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god. Despite being closer to the Sun than Venus, its temperatures aren't as terribly hot as that planet's. Its surface is quite similar to that of Earth's Moon, which means there are a lot of craters and plains

Speaking of craters, many of them were named after artists or authors who made significant contributions to their respective fields. Mercury takes a little more than 58 days to complete its rotation, so try to imagine how long days must be there! Since the temperatures are so extreme, albeit not as extreme as in Venus, and the solar radiation is so high, Mercury has been deemed to be non-habitable for humans

THE SLIDE TITLE GOES HERE!

Do you know what helps you make your point crystal clear? Lists like this one:

- They're simple
- You can organize your ideas clearly
- You'll never forget to buy milk!

And the most important thing: the audience won't miss the point of your presentation
